

G-FARM AQUA SOLUTIONS

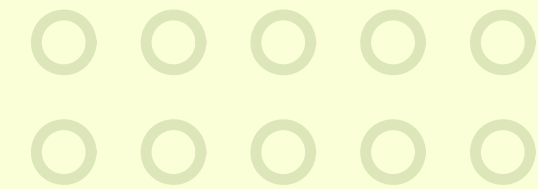

Transforming Rural Livelihoods Through Sustainable Aquaculture & Water Systems

Youth-Led | Climate-Smart Aquaculture | Clean
Water Innovation | Green-Blue Skills Training

About Us

Founded in **2021**, G-FARM Aqua Solutions is a youth-led social enterprise based in Kisumu County, Western Kenya.

We started as an aquaculture support enterprise and have evolved into an integrated aquaculture and clean water solutions provider.

We deliver:

- Climate-smart aquaculture systems
- Sustainable water innovation solutions
- Green-Blue skills training for youth and schools

Our Vision and Mission

VISION

To be East Africa's leading aquaculture and climate-resilient enterprise transforming rural livelihoods through innovation.

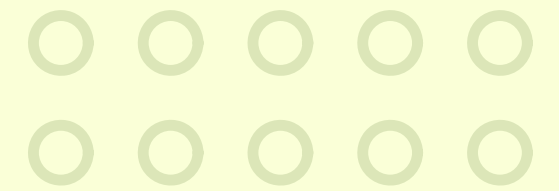

MISSION

To deliver affordable aquaculture systems, clean water solutions, and youth capacity-building programs across Kenya.

The Problem

FOOD INSECURITY

- Kenya produces 180–240K tons of fish annually, far below demand (550–600K tons).

WATER SCARCITY

- 18M+ Kenyans lack access to safe drinking water.

HIGH INPUT COSTS & POOR QUALITY

- Expensive commercial feeds
- Substandard fingerlings lowering yields

YOUTH UNEMPLOYMENT

- 75% of youth under 35 lack formal employment.

CLIMATE STRESS

- Drought and water stress threaten farming and livelihoods.

OUR SOLUTION

We provide an integrated green-blue solution:

AQUACULTURE INFRASTRUCTURE

- Hatchery setup
- Pond construction
- Tank systems
- HDPE pond liners
- Nets & equipment

CLEAN WATER & WASH INNOVATION

- Bottled water production
- Water system design
- Hydrological condenser prototype

FISH INPUTS

- Quality tilapia & catfish fingerlings
- Affordable, locally formulated feeds

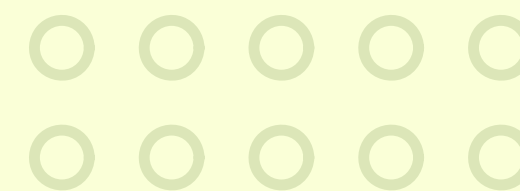

SKILLS & CAPACITY BUILDING

- Aquaculture Field Schools
- Youth entrepreneurship training
- eMpower Lab (Aquaculture Knowledge Centre)

Market Opportunity

GROWING DEMAND

- Fish production grew 14% in 2023. Kenya aims to double fish consumption by 2030.

LARGE SUPPLY GAP

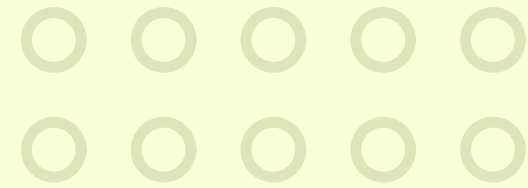

- Current output: 180–240K tons
- Demand: 550–600K tons

REGIONAL OPPORTUNITY

- Similar aquaculture and water gaps exist across East Africa.

GOVERNMENT SUPPORT

BUSINESS MODEL

We operate a blended revenue model:
Revenue Streams

PRODUCTS

- Pond infrastructure (liners, tanks, systems)
- Fingerlings
- Fish feeds
- Bottled water

PROGRAMS

- Paid training
- School partnerships
- Development agency contracts

SERVICES

Hatchery setup & design
Water system engineering
Technical consultancy

IMPACT CAPITAL

- Grants
- Concessional investment
- Subsidized community projects

TRACTION & TARGET IMPACT

CURRENT TRACTION

- 100+ youth trained in aquaculture & entrepreneurship
- 1 operational hatchery with clean water system
- 1 school hosting Aquaculture Field School Model
- KEPSA internship partnership secured
- eMpower Lab in development

BY 2030 WE WILL:

- Train 5,000+ youth
- Establish 10 hatcheries
- Support 2,000+ farmers
- Launch 50+ Aquaculture Field Schools
- Provide clean water to 50,000+ people
- Enable 5,000+ tons of fish annually
- Create 1,000+ decent jobs

COMPETITIVE ADVANTAGE

INTEGRATED IMPACT MODEL

- Aquaculture + Water + Skills + Infrastructure in one ecosystem.

INNOVATION-FOCUSED

- HDPE pond liners
- Hydrological condenser prototype
- eMpower Lab Knowledge Centre

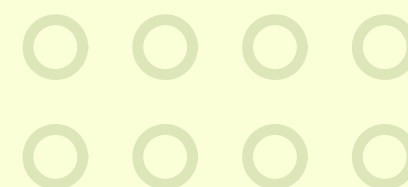

COMMUNITY-DRIVEN DESIGN

- Built with farmers, not just for farmers.

POLICY & SDG ALIGNMENT

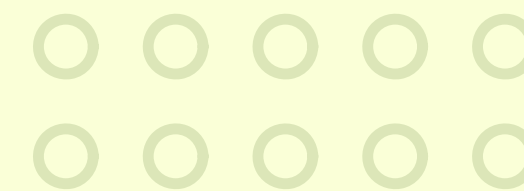

Aligned with:

- Kenya Blue Economy Strategy
- Vision 2030
- Climate Smart Agriculture Framework
- SDGs 2, 6, 8, 12, 13, 14, 17

FINANCIAL ASK

We are seeking \$250,000 in blended finance (Grant + Impact Investment) to:

- Scale hatchery infrastructure (10 units)
- Expand clean water systems
- Launch Aquaculture Field Schools across counties
- Train 5,000 youth
- Reach 50,000 people with clean water
- Strengthen working capital for feeds & fingerlings

Outcome:

- A scalable, revenue-generating, climate-resilient aquaculture ecosystem.
