EXECUTIVE SUMMARY

MikeLabs is an AI-first technology company that designs and builds practical digital systems for organizations that want to work smarter and operate digitally.

We combine software engineering with AI, databases, web

WHY MIKELABS

- ✓ AI-first delivery
- ✓ Custom systems
- ✓ Practical automation
- ✓ Cloud-ready builds

OUR STORY

From ideas and business problems to working digital systems.

Mikelabs was built around a simple idea: technology should solve a business problem, not become another problem. Our work brings together modern AI, software engineering and reliable digital infrastructure to create systems people can actually use.

MISSION

Build practical AI-powered software that helps businesses automate, organize and grow.

VISION

Become a trusted engineering partner for modern businesses in Kenya and beyond.

WHAT WE BUILD

AI

AI SYSTEMS & AGENTS

AI assistants, integrations, agent workflows and intelligent business tools.

WEB

WEBSITES & WEB APPS

Business sites, portals, ecommerce experiences and custom web applications.

DB

DATABASES & DATA

Structured databases, dashboards, admin panels, reporting and data workflows.

AUTO

AUTOMATION

n8n-style workflows, APIs, notifications and repetitive-process automation.

CLOUD

CLOUD & DEPLOYMENT

Dockerized systems, cloud servers, domains, deployment and operational setup.

SEC

SECURITY

Security-aware engineering, access controls, safer deployments and maintenance.

WHO WE SERVE

- ✓ SMEs & founders
- ✓ Schools & institutions
- ✓ Service businesses
- ✓ Organizations building internal tools

OUR APPROACH

Start with the workflow. Choose the right technology. Build only what creates useful leverage.

HOW WE OPERATE

CAPABILITIES & DIRECTION

A practical engineering partner for digital transformation.

ENGINEERING CAPABILITIES

AI

Integrations, assistants, agent workflows

WEB

Websites, portals, ecommerce, custom apps

DATA

SQL databases, dashboards, admin systems

AUTOMATION

Workflow automation, APIs, notifications

CLOUD

Servers, Docker, domains, deployment

SECURITY

Access controls, hardening, maintenance

OUR 2026-2028 DIRECTION

- ✓ Productize repeatable AI assistants and business workflows
- ✓ Expand custom systems for schools, SMEs and service companies
- ✓ Strengthen reusable database, dashboard and automation foundations
- ✓ Serve more regional and international clients through remote delivery

SELECTED SOLUTION AREAS

BUSINESS WEBSITES

Professional sites with CMS/admin tools and conversion-focused structure.

SCHOOL SYSTEMS

Student, class, attendance and administration workflows built around the school.

AI WORKFLOWS

Assistants that connect models, data, APIs and business processes.

OPERATIONS DASHBOARDS

Centralized views for records, reports, activity and internal operations.

AI-FIRST

Use AI where it genuinely reduces effort or improves the workflow.

SYSTEMS

Connect websites, databases, automation and operations instead of building isolated pieces.

MAINTAINABLE

Prefer understandable structures, documented flows and systems that can evolve.

LET'S CONNECT

Build. Break. Secure.
